PERSONAL PROJECTS

Restaurant Management System

- Build a tool to search for restaurants using MERN Stack. There are mainly two types of users in this application: end-users and admins. Admins can manage all operations on the application such as adding new items to restaurants, editing existing items, deleting items, etc.

Job Recruitment Portal

- Developed an advanced job recruitment portal using the MERN stack. with roles for Admin, Company, and Job Seeker. The platform streamlines job search and applications, enables efficient resume management, and schedules interviews. Admins manage operations, companies post jobs and review resumes, while job seekers apply easily and auto-generate resumes.

Intelligent & Robust Information System(IRIS)

- Developed Iris, an advanced voice assistant for desktop users, built with Python, offering a hands-free experience. Users can open Notepad with live typing, access YouTube, send emails, get daily news updates, and perform various other tasks through voice commands, enhancing productivity and convenience.

CERTIFICATES

Data Base Management System (NPTEL)

Learned database management and MySQL through NPTEL, mastering design, querying, and optimization techniques.

Problem Solving (Basic)

Earned a certification in Problem Solving (Basic) from HackerRank, demonstrating proficiency in algorithmic thinking and coding skills.

Frontend Development

Completed the full frontend development course by Meta, mastering HTML, CSS, JavaScript, and React.
